1. Tell me about yourself.
2. What challenges did you face while implementing RAG?
3. Which algorithms did you use in your RAG pipeline?
4. Why did you use hybrid search?
5. Why did you use reranking?
6. How did you reduce hallucinations?
7. How did you evaluate your RAG system?
8. Explain the architecture of GPT-4.
9. What cloud platforms have you worked with?
10. What if the project uses AWS instead of Azure?
11. Can you deploy a RAG application on AWS?
12. How would you improve RAG performance?
13. What is Agentic AI?
14. What is the difference between RAG and Agentic AI?
15. Why did you use LangGraph?
16. What is your biggest strength?
